

WINTER 2011

# HAYGAIN

## Newsletter

Volume 1, Issue 2

## HAYGAIN client, JT Burnley, and his horse, Rainman, have a successful 2011 Season!

Ron William II is a 5 year old Hanoverian gelding owned by Dr. Anna K. Hopla. Known as "Rainman," the horse had his first year of dressage competition this year and was a four timer recipient of the "High Point Open Horse" in five USDF competitions! Not a bad start!! He also was rewarded with the Adequan/USDF Horse of the Year finishing in the top ten at First Level. I recommend HAYGAIN for all top athletes that need the best of respiratory health in order to compete. He was also a top ten qualifier for his Breed division! Welcome to Team HAYGAIN and well done JT and Rainman!

## HAYGAIN DEALER SPOTLIGHT

SmartPak is great place to  
order your HAYGAIN!

Starting in 1999, SmartPak  
has become a place to find  
anything you or your horse  
may need! Check them out  
at [www.smartpakequine.com](http://www.smartpakequine.com)

## What our customers are saying:

"I have only been using the HAYGAIN a short time, but I am very happy with the results that I am seeing. One of my horses has had a dry cough for quite a while. I started feeding her out of the HAYGAIN and within a couple days her cough has gone away. I can't wait to keep seeing the benefits of the HAYGAIN."

Sherry Cervi  
3 time NFR World Champion

In 2010 I found out that one of my barrel horses was a "bleeder." Lasix controlled the bleeding but he has a strong personality and did not enjoy the shots one bit, all the while letting me know that. When HAYGAIN was introduced to me, I could not wait to get him on the steamed hay and see if I got a positive response. Not only did he stop coughing but the HAYGAIN steamed hay along with a supplement from John Ewing 707 have eliminated my use of Lasix and certainly made him a happier horse. In 2011 he went on to set two arena records, win or place at multiple rodeos, and qualify for several association finals. All of our horses love steamed hay and when they smell the aroma, they let us know it is feeding time. The entire Lambert family and all of our horses are big believers in the benefits of steaming hay. It's a simple, no hassle process that is worth every amount of time and money spent.

Wiggins, CO

"I received our first HAYGAIN Steamer about 9 months after losing my favorite FEI partner to COPD resulting from pneumonia that started at a horse show. I worked so hard to save him including soaking all hay and watering all bedding. I only wished I had known about HAYGAIN sooner. Now I not only use my HAYGAIN at home for our competition horses, but recommend them for my equine patients during many of my veterinary calls. I recommend them for all top athletes that need the best of respiratory health in order to compete.

As an asthmatic and an athlete myself, I cannot stick my nose in a regular bale of hay, but I can in a bale that has come out of the HAYGAIN machine!

I also recommend HAYGAIN in my practice for horses with respiratory and skin allergies, COPD, inappetance, and colic issues. Since starting to use a HAYGAIN; I have seen many changes in horses for the better. I really appreciate you building such a superior product. I never want to go back to soaking hay again!!"

Sincerely,  
Wren Burnley DVM, FEI Dressage Rider and Trainer

I can't thank you enough for this wonderful service. The women who had recommended this product said to me she had excellent customer service and she was right.

I also want to thank HAYGAIN not only for their excellent shipping and customer service, but for such a super product! My older mare, with severe breathing problems, has not been on her expensive asthma meds for over a year, and I never hear her cough. Also, my daughter's competitive hunter is now happily eating steamed hay and has increased his energy and overall health.

Thanks again

"I received my HAYGAIN steamer last Wednesday (less than 48 hours after talking to you!). It arrived at 10am and I was "cooking" hay for a noon lunch! I was really impressed by the simplicity of the system. Of course the horses love the hay.

My mare with respiratory issues is back to normal this weekend...wish I could give 100% credit to HAYGAIN but also have to give some credit to the cold spell and Clenbuterol...but the point is, with these horses, you have to take a multi-faceted approach to management and HAYGAIN is one important aspect.

Karen J. Wolfsheimer, DVM, Ph.D, Dipl. ACVIM (SAIM) Micanopy, FL 32667

Congratulations to Ashley Johnson and Bailey Burkenpas of Snohomish County Washington for placing 9<sup>th</sup> in the EasternNational 4-H Round-Up at the Expo Center in Louisville, KY on November 5, 2011. Their team presentation was on the effects of steaming hay. Well done girls!

#### HAYGAIN

If you are looking for a method of enhancing your horse's health and respiratory performance, HAYGAIN Hay Steamers may be able to help. The HAYGAIN method is unique and consists of a patented manifold system proven to introduce the steam in the most effective manner, a specially designed insulated container and a built-for-purpose steam generator. All components are designed and manufactured by HAYGAIN. Extensive research into steam and temperature distribution through hay has resulted in HAYGAIN's product designs. The steam is introduced through perforated spikes, forcing steam from the center of the hay outward, so all the hay is steamed evenly. In addition, the aluminum plates, which hold the spikes, accumulate more heat under the bale to assist with raising the temperature inside the box, thus improving the efficiency. The insulated box traps the steam until the container is completely filled, raising and maintaining the necessary high temperatures to kill fungal spores and bacteria found in hay. To learn more, visit [haygain.us](http://haygain.us) or call (800) 525-4339.

Thanks to Barrel Horse News, Laura Lambert and Bonnie Wheatley for this article!
